Advert reference number: FP– Lej 029

Professional Nurse – NIMART X 5 (APACE)
The Wits Reproductive Health and HIV Institute (Wits RHI) is a renowned African-led research institute that seeks solutions to Africa’s health challenges. It is located within the University of the Witwatersrand and addresses some of the greatest public health concerns affecting our region, including HIV and its related problems, sexual and reproductive health and vaccinology. We do this through pioneering, multi-disciplinary research; responsive technical support and innovation in health services; and evidence-based policy development and advocacy with national, regional and global stakeholders.

Main purpose of the job
To initiate ART, manage HIV/TB clients, provide PICT and manage minor ailments in support of achievement of APACE programme targets.

Location
Wits RHI – Lejweleputswa (Free State)

Key performance areas:
Clinical care and treatment
- Provide HTS at all service points at the clinic.
- Examine and treat HIV infected patients.
- Treat opportunistic infections diagnosed.
- Prescribe appropriate treatments.
- Provide ART and prophylaxis according to DoH guidelines.
- Identify and refer patients with ART failure or complications.
- Support counsellors to manage adherence issues in patients on ART.
- Facilitate services such as down- and up-referrals.
- Assist with development and implementation SOP’s that will improve the running of the clinic e.g. up-referral SOP.
- Treat patients with HIV and other concomitant diseases or refer where appropriate.
- Provide comprehensive follow-up services for patients on treatment as required.
- Implement programme activities in HTS and non-clinical prevention such as testing for HIV in TB patients, FP and STI, condom distribution, male circumcision and pre- and post-treatment adherence.
- Implement programme activities in PMTCT such as paediatric diagnosis, care and treatment, reproductive health including family planning, general adult HIV treatment and chronic care, HIV wellness programmes, Tuberculosis screening and care, Nurse-initiated and managed ART.
Programme implementation and Quality improvement (QI).

- Regularly conduct clinical and SIMS audits to identify facility level gaps in programme implementation and clinical care.
- Monitor and review the implementation and progress of facility level implementation plans in conjunction with relevant stakeholders and the RHI APACE team.
- Regularly monitor and track facility performance in relation to programme targets.
- Implement remedial plans to address identified gaps, together with the facility team.
- Support the identification, implementation and monitoring of QI projects, taking into consideration the needs and priorities of the clinic.
- Track changes made that lead to improved outcome measures at the facility level.
- Review challenges and achievements and escalate challenges timeously.
- Report accurate data on activities conducted, according to data reporting requirements.
- Compile and disseminate reports on facility implementation, according to agreed reporting requirements.
- Act as the first point of contact for APACE activities at the facility level.
