

# Mobile Health (mHealth) Technologies for HIV/AIDS Implementation

**Date:** August 21 – September 01, 2017. **Time:** 08h30-17h00 Each Day

## About the Course

This course aims to present a broad range of perspectives on mHealth and impact on the future of HIV/AIDS implementation research. Through case studies, multimedia tutorials, interactive exercises, and live demonstrations of tools, participants will explore delivery mechanisms, such as interactive voice recognition (IVR), SMS (text message) communication programs, smartphone applications, and health information systems for data collection and management.

*Certificate Type: Competence or Attendance*

*Application Deadline: August 07, 2017*

*Outsiders: R 8000*

*From Wits: R 4000*
